

CEMENTING UNIT

FOR MIXING CEMENT BLENDS
AND PUMPING FLUIDS

GOES

Mixing Homogeneous Cement Blends

Twin Cementing Unit Trailer Mounted

APPLICATIONS

- Variety of fluid pumping operations including oil well cementing, pressure testing, solvent pumping, acidizing
- Treatments and fluid pumping through coiled tubing
- Utilized for extreme climates from arctic to desert and tropical conditions

FEATURES

- Truck, trailer or skid mounted
- Diesel deck engines complete with power shift transmissions
- Various diesel engine configurations in order to reach the desired HP rating
- Built to European standards (optional)
- CE conformity (optional)
- Emergency shutdown
- Various transmissions
- 600 BHP high pressure pumps
- Various pump manufacturers and fluid end sizes
- Hydraulically operated pressurizing and recirculating centrifugal pumps
- Hydraulically driven mixing pumps
- Dual compartment, steel fabricated displacement tank with augers in each compartment (optional)
- Open or closed coated (optional) displacement tank for acidizing jobs
- Elevated weather resistant control console or air conditioned control cab (optional)

Control Panel

- High energy recirculating mixing system or ground mixing system
- Automatic Density Control (ADC) system
- Data acquisition system with operational parameters are measured and recorded every second
- Nuclear or coriolis density measurement
- Heating and cooling packages available to meet all climate conditions
- Controls and instrumentation devices include a combination of pneumatic, hydraulic and electrical devices
- Storage racks for hoses, treating iron and swivels
