

## HOT WATER UNIT

FOR AN ACCURATE  
FLUID SUPPLY

# Heating and Filtration

*Truck Mounted Unit with 6.000 l Diesel Tank*

*Skid Mounted System powered by Generator*

## APPLICATIONS

- Mobile hot oil pump used for circulation of hot fluids into production wells, flushing of flow lines, well annulus and flow tubing
- Utilized for extreme climates from arctic to desert and tropical conditions
- Filtering water

*Open Flame Burner*

*Simple Water Circulation*

## FEATURES

- Truck, trailer or skid / container mounted
- Various engines
- Built to European standards (optional)
- CE conformity (optional)
- Diesel fired burner complete with heat exchanger
- Automatic burner controls
- Steel heater
- Various sized displacement tank with closed top, man-ways and vents
- Positive displacement triplex pump
- Boosting or fill in pump
- Circulating and charge pump
- Locally mounted control and instrumentation panel
- Filtration system (optional)
- Suction and discharge hoses
- Recording package
- Over-pressure shutdown
- Remote control operation
- Discharge iron and fittings

*Buderus Heating System*
