

TWIN PUMPING UNIT

TRUCK, TRAILER
OR SKID MOUNTED

Twin Pumping Unit

Rear View

Mixing Tank

APPLICATIONS

- Variety of fluid pumping operations including oil well cementing, pressure testing, solvent pumping, acidizing
- Treatments and fluid pumping through coiled tubing
- Utilized for extreme climates from arctic to desert and tropical conditions

FEATURES

- Truck, trailer or skid mounted
- Diesel deck engines complete with power shift transmissions
- Various diesel engine configurations in order to reach the desired HP rating
- Built to European standards (optional)
- CE conformity (optional)
- Emergency shutdown
- Various transmissions
- 600 BHP high pressure pumps
- Various pump manufacturers and fluid end sizes
- Hydraulically operated centrifugal pumps

Control Panel

- Dual compartment, steel or stainless steel fabricated displacement tank with augers in each compartment (optional)
- Open or closed coated (optional) displacement tank for acidizing jobs
- Elevated weather resistant control console or air conditioned control cab (optional)
- GOES Data Acquisition System measures and records operational parameters every second
- Heating and cooling packages available to meet all climate conditions
- Instrumentation devices include a combination of pneumatic, hydraulic and electrical devices
- Storage racks for hoses, treating iron and swivels
