

GOES GmbH (German Oilfield Equipment & Services) is a successful, medium-sized company acting in special purpose machinery and plant construction. We supply worldwide technologically sophisticated machines and complete systems for oil and gas production.

We are a leader in Europe in the field of downhole stimulation equipment. Our value chain includes development, design, manufacturing, commissioning and customer service on site.

For our young, dynamic company we are going to hire reinforcement for our automation department as soon as possible by a

Softwaredeveloper (m/f)

for the development of software in the area of Data Acquisition and Data Management..

You have own an apprenticeship certificate or a university degree in IT or electronics, you like to bring your own ideas and work independently in a flat hierarchy. Ideally you also have experience in the development of (online) database systems and programming in .NET.

Then we offer you an interesting and versatile field of work as well as a future-proof workplace in a young, motivated team as well as personal and professional development opportunities and interesting perspectives in an international company.

We are looking forward to receive your meaningful application.
